## (54) DISK MEDIUM AND DISK DEVICE MOUNTED WITH THE SAME

## (57)Abstract:

PROBLEM TO BE SOLVED: To increase a flying margin between a head and a disk medium at the time of fix point flying.

SOLUTION: Separately from a contact start stop (CSS) area 10a arranged in the innermost circumferential side of a magnetic disk medium 10, a fixed point flying area 10c having finer surface roughness compared with that of the CSS area 10a is provided on the outermost circumferential side, and a head is made to fly at a fixed point above this fixed point flying area 10c. It is desirable that tracks having a same format as a data area 10b and tracks is formed on this fixed point flying area 10c.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's  
decision of rejection]

[Date of requesting appeal against  
examiner's decision of rejection]

[Date of extinction of right]
